What is FoodSource?

- iOS App
- Marketplace to buy/sell food directly from its source
  - Buyers:
    - People who want convenient access to organic, ethically sourced food
  - Sellers:
    - Farmers, gardeners, hunters, fisherman, beekeepers, etc.
- How it works:
  - Sellers upload listings of their food
  - Buyers pay through the app
  - They decide on either pickup, drop off, or shipping
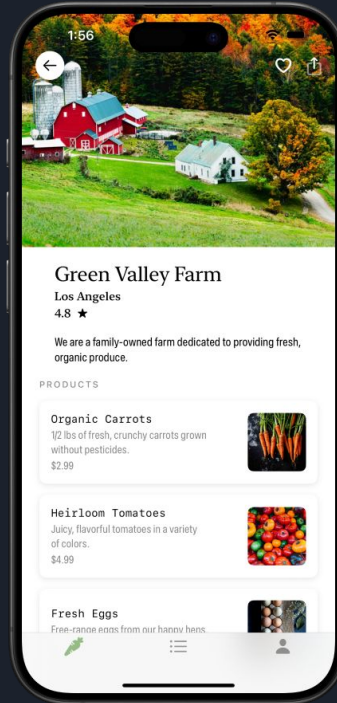

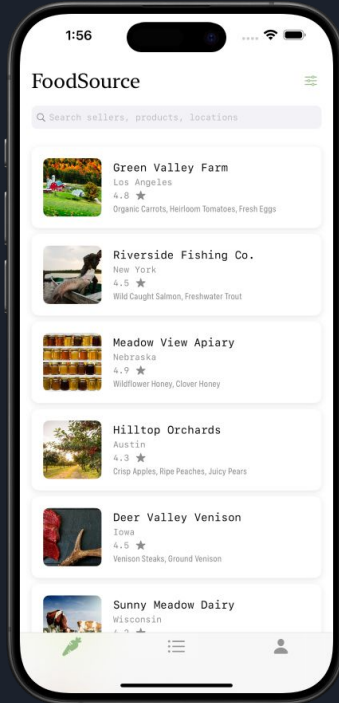

Project Goals

- Full order flow
  - Product creation
  - Browse and purchase
  - Payment processed then paid out
  - Order registered, shipping tracked
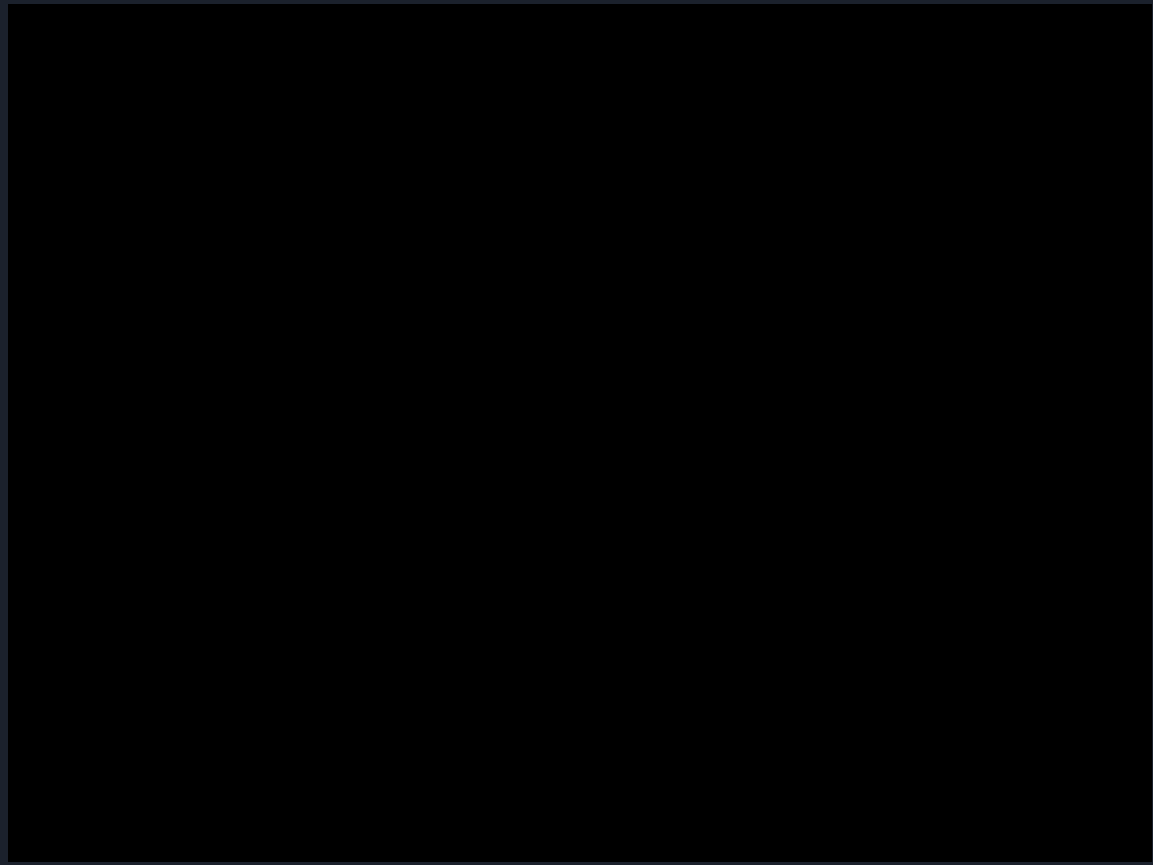

Why this project?

- Hard to find affordable, organic, ethically sourced food
- Wanted to use a service like this
- Interested in full-stack mobile development

User Interface

Demo

Challenges

- Stripe Connect SDK
- Seller verification
- Scope

Todo

- In app messaging
- Improved discoverability
- Refunds, disputes, problems, etc.
- UI Improvement
- Publish to App Store
